ANNOUNCEMENT

COMMENCEMENT OF CO₂ SEQUESTRATION ECBM PILOT ON AN ENLARGED OPERATIONS AREA

The Board is pleased to announce the commencement of well operations at the Pilot Project site and establishment of an enlarged operations area.

The board (“**Board**”) of directors (“**Directors**”) of Enviro Energy International Holdings Limited (“**Company**”) is pleased to announce that China United Coalbed Methane Corp., Ltd. (“**CUCBM**”), in support of China’s vision to ensure the development of a sustainable low-carbon pathway, the operator of the Deep Un-mineable Coal CO₂ Sequestration and Enhanced Coalbed Methane (“**ECBM**”) Pilot Project in China (“**Pilot Project**”) has initiated well operations at the Pilot Project site in Shanxi Province, China. At the same time, the Company is pleased to report that the Pilot Project operations area has been enlarged to 5.0 square kilometres, with discussions for, following the success of Phase One, a much larger area for Phase Two of the Pilot Project. Well SX-001 has begun de-watering in preparation for the injection of CO₂ into the target coal seam(s). The current phase of operations will provide baseline data on water and coalbed methane (“**CBM**”) production from the target coal seams no. 3 (approximately 5 metres thick) and no. 15 (approximately 6.6 metres thick).

The Pilot Project is located in CUCBM’s Shizhuang North block in the Qinshui Basin of Shanxi Province, China. The Qinshui Basin is one of the more prolific CBM producing regions in China and the coal seams are prospective for ECBM production.

The Pilot Project has the objectives of confirming the suitability of the coal seams for CO₂ sequestration and long term storage while piloting the enhanced production of CBM from the coal seams in which the CO₂ is stored. Coal is deemed to have long term storage potential for CO₂ because CO₂ will preferentially adhere to the coal cleat surface while displacing methane contained in the coal.

The Pilot Project is an international cooperative venture between the Company, Petromin Resources Limited (“**Petromin**”) and CUCBM. Petromin’s shares are listed on the Venture Exchange of the Toronto Stock Exchange and Petromin is a connected person of the Company by virtue of it being a substantial shareholder of a non wholly-owned subsidiary of the Company. The parties will jointly retain the intellectual property developed during the pilot campaign. CUCBM is supported financially in the venture by the China Ministry of Science and Technology.

On 18 November 2009, a top level CUCBM delegation attended Petromin's Vancouver offices and held a Joint Project Steering Committee meeting with representatives from the Company, Petromin and the Alberta Research Council. CUCBM emphasized the importance and high priority that their Government is giving the Pilot Project as it directly relates to both their environmental and clean energy future planning. CUCBM was represented by Mr. Feng Sanli, president; Dr. Ye Jianping, assistant to president; Ms. Yang Yi, director of Foreign Affairs; and Mr. Hu Bin, engineer, Department of Science and Technology Management. The CUCBM delegation also attended the Unconventional Gas Conference organised by Canadian Society of Unconventional Gas in Calgary, Canada from 18 to 20 November 2009, before returning to China.

Petromin and the Company utilize the Alberta Research Council as their principal technical consultant on the Pilot Project.

Recent public statements by the Chinese leadership include a promise to cut CO₂ emissions per unit of gross domestic product by a "notable margin" by 2020 from the 2005 level. The Board believes that the Pilot Project is well positioned to assist China in the achievement of its greenhouse gas emission goals by championing technological advances in ECBM in China while ultimately leading to commercialisation of the technology and that there is a strong measure of support for our efforts from the Chinese Government.

By Order of the Board
Enviro Energy International Holdings Limited
Chan Wing Him Kenny
Chairman and Chief Executive Officer

Hong Kong, 24 November 2009

As at the date of this announcement, the Directors are:

Executive Directors

Mr. Chan Wing Him Kenny
Dr. Arthur Ross Gorrell

Independent non-executive Directors

Mr. David Tsoi
Mr. Lo Chi Kit
Mr. Tam Hang Chuen

This announcement, for which the Directors collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of The Stock Exchange of Hong Kong Limited ("GEM") for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (1) the information contained in this announcement is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in this announcement misleading; and (3) all opinions expressed in this announcement have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

This announcement will remain on the website of GEM at www.hkgem.com on the "Latest Company Announcements" page for at least 7 days and the website of the Company at www.enviro-energy.com.hk.
