**GEOLOGICAL EVALUATION AND DRILLING AT MAROS MARBLE PROJECT  
IN SOUTHWESTERN SULAWESI, INDONESIA**

The Company is pleased to announce that BHE has initiated geological evaluation and drilling at its Maros Marble Project in southwestern Sulawesi, Indonesia.

Enviro Energy International Holdings Limited (“**Company**”) is pleased to announce that PT. Bara Hugo Energy (“**BHE**”) has initiated geological evaluation and drilling at its Maros marble project in southwestern Sulawesi, Indonesia (“**Maros Marble Project**”).

The Maros Marble Project is located in a highly prospective, marble-producing area of Sulawesi and is on-trend with high quality marble quarry operations. Current operations in the area produce export quality marble.

Preliminary geological evaluation of the 33 hectare concession area held by BHE was completed by PT. Namsuma Luban Abadi (“**NLA**”). NLA geologists mapped and sampled the target geological formations across the concession.

The Company has also retained PT Runge Indonesia (“**Runge**”) for further early-stage evaluation and consulting. Runge has completed a field visit to the site, preliminarily confirmed the prospective area outlined by NLA and has proposed a multiple hole diamond drilling program to further explore the resource potential of the concession.

A seven-drill-hole campaign has been initiated under the direction of NLA using local crews and equipment. Drill site preparation is currently underway. Runge will further provide sampling and analysis consulting and train crew leader(s) in proper marble core handling, preparation, storage and transport.

Marble analyses are expected to be completed in Indonesia and Australia laboratories according to appropriate international standards. In due course following evaluation of the results of current activities, the Company plans to proceed to complete marble resource and reserve estimations according to international industry standards. Commercial development could then follow should marble reserves be identified.

The Company indirectly holds 95% of BHE which in turn holds 37.5% of PT. Grasada Multinational (“**GM**”), the entity holding the mining permit covering the Maros Marble Project. BHE also holds warrants in GM which upon exercise will bring its shareholding in GM to 60%.

By Order of the Board  
**Enviro Energy International Holdings Limited**  
**Chan Wing Him Kenny**  
*Chairman and Chief Executive Officer*

Hong Kong, 15 November 2012
