**ISSUE OF COMPETENT PERSON'S REPORT
ON MARBLE QUARRY IN
MAROS REGENCY, SOUTH SULAWESI, INDONESIA**

The Board is pleased to announce that the Company has completed a CPR for the Marble Quarry located in Selenrang Village, Bontoa District, Maros Regency, South Sulawesi, Indonesia under the VALMIN Code and the JORC Code, recognised reporting standards under Chapter 18 of the Listing Rules. The CPR estimates mineable reserves at the Marble Quarry of approximately 2,613,000 m³.

The board ("**Board**") of directors ("**Directors**") of Enviro Energy International Holdings Limited ("**Company**") is pleased to announced that the Company has completed a competent person's report ("**CPR**") on 14 February 2014 on the independent review of the marble quarry ("**Marble Quarry**") located in Selenrang Village, Bontoa District, Maros Regency, South Sulawesi, Indonesia under the VALMIN Code and the JORC Code (both hereinafter defined), recognised reporting standards under Chapter 18 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited ("**Listing Rules**").

The reporting standard used in the CPR is the VALMIN Code for Technical Assessment and Valuation of Mineral Assets and Mineral Securities for Independent Expert Reports (2005 edition) ("**VALMIN Code**") as adopted by the VALMIN Committee, a joint committee of The Australasian Institute of Mining and Metallurgy, the Australian Institute of Geoscientists and the Mineral Industry Consultants Association, as amended from time to time. Mineral resources and ore reserves defined for the quarry have been reviewed for conformity with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (2012 edition) prepared by the Joint Ore Reserves Committee ("**JORC Code**") which comprises representatives of each of The Australasian Institute of Mining and Metallurgy, the Australian Institute of Geoscientists and The Minerals Council of Australia, as amended from time to time.

The CPR estimates mineable reserves at the Marble Quarry of approximately 2,613,000 m³, details of which are set forth below:

<i>JORC resources</i>	<i>Limestone resources (m³)</i>
Measured	5,820,100
Indicated	3,880,035
Total	9,700,135

<i>JORC reserves</i>	<i>Limestone reserves (m³)</i>	<i>Mineable reserves (m³)</i>
Proved	4,481,000	1,568,000
Probable	2,987,000	1,045,000
Total	7,468,000	2,613,000

The above figures are based on, among others, deposit geology, drilling results, downslope survey and sampling information performed at the Marble Quarry.

The completion of the CPR advances the strategy and the execution of the Company's business plans in industrial minerals generally and marble in particular.

The Company indirectly holds approximately 90% of PT. Bara Hugo Energy ("BHE") which in turns holds 37.5% of PT. Grasada Multinational ("GM"), which owns 100% of the Marble Quarry. BHE also holds warrants in GM which upon exercise will bring its shareholding in GM to 60%. The Company, through another subsidiary, also holds varying interests in an operating marble quarry in Indonesia.

By Order of the Board
Enviro Energy International Holdings Limited
Chan Wing Him Kenny
Chairman and Chief Executive Officer
